

AngularComponents

This project was generated with [Angular CLI](#) version 7.2.2.

Development server

Run `npm start` for a dev server. Navigate to `http://localhost:4200/`. The app will automatically reload if you change any of the source files.

Build

Run `npm run build` to build the project in production mode. Run `npm run build-dev` to build the project in development mode. The build artifacts will be stored in the `dist/` directory. Run `npm run serve-dist` to serve the compiled source of `dist/` folder.

Lint

Run `npm run lint` to linting source files.

Running unit tests

Run `ng test` to execute the unit tests via [Karma](#).

Running end-to-end tests

Run `ng e2e` to execute the end-to-end tests via [Protractor](#).
